

BLEMISH + AGE CLEANSING GEL

CLEANSE & TONE

Ideal for skin prone to blemishes and aging, Blemish + Age Cleansing Gel contains a powerful trio of exfoliating acids plus non-drying cleansing agents to remove impurities and excess oils. This daily cleanser targets blemishes and photoaging and prepares skin for Blemish + Age Solution and Blemish + Age Defense.

FEATURES AND BENEFITS

Micro-exfoliating cleansing gel ideal for skin prone to blemishes and aging

- Thorough cleansing agents combined with a triple threat of exfoliating acids
- Non-drying
- Prepares skin for clinical peel procedures, particularly Micropeel or Micropeel Plus

0.2% Capryloyl Salicylic Acid

- Precise, lipid-soluble exfoliation
- Decongests clogged pores
- Diminishes surface indicators of age

0.2% Salicylic Acid

- Refines pores
- Helps reduce breakouts

3.5% Glycolic Acid

- Accelerates exfoliation
- Hydrates skin
- Reduces the appearance of signs of aging

USAGE AND RECOMMENDATIONS

- Inflammatory blemishes
- Non-inflammatory blemishes
- Photodamaged or photoaged skin
- Hyperpigmentation or uneven skin tone
- Fine lines and wrinkles
- Combination/oily skin
- Prior to clinical peels, particularly Micropeel or Micropeel Plus

APPLICATION

Using fingertips, massage into skin. Rinse with tepid water.

BACKGROUND

Though traditionally positioned as an issue affecting teenagers, blemishes and imperfections are a common adult condition: 48% of European women ages 30-49 suffer from breakouts. Imperfections may appear as inflammatory blemishes—red, inflamed papules and pustules—or as non-inflammatory blemishes, which are commonly referred to as whiteheads and blackheads. In addition, adults who battle imperfections have a unique set of aging concerns: as oil glands enlarge with age, pores increase in size; the skin’s texture becomes rough; and post-breakout hyperpigmentation can linger long after blemishes subside.

Traditional blemish treatments solely address breakouts, ignoring the anti-aging needs of the adult client. Drug therapies can be sensitizing and drying with a low tolerance profile, and do not address hyperpigmentation, fine lines, or wrinkles. In addition, drug therapies can be overly disruptive to facial appearance, accelerating signs of aging in the adult client.

KEY INGREDIENTS

Results based on *in-vivo* testing

Capryloyl Salicylic Acid

- Unique lipid structure that is similar to the lipid structure of human skin
- Targets optimal cells for exfoliation, resulting in a precise, “cell-by-cell” desquamation
- Anti-bacterial and anti-inflammatory

Salicylic Acid

- Lipid-soluble beta hydroxy acid
- Accelerates the desquamation of epidermal cells
- Highly effective at clearing cellular debris

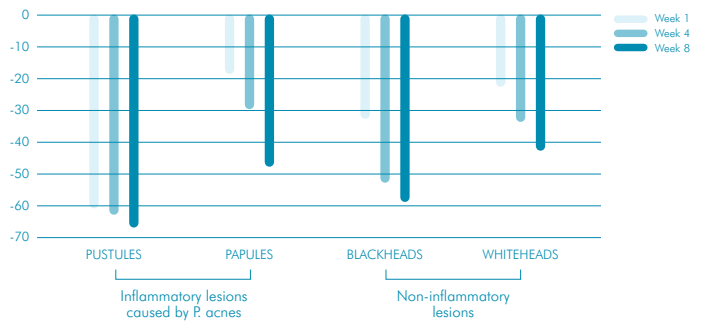

Glycolic Acid

- Alpha hydroxy acids
- Work synergistically to reduce cell adhesion in the upper levels of the epidermis
- Smooth skin, reduce skin imperfections, and minimize the appearance of fine lines and wrinkles

BLEMISH + AGE LINE UP CLINICAL STUDY

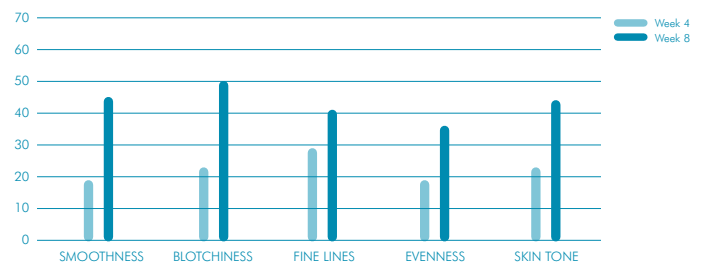

Results of a dermatologist-controlled 8-week study of 50 multi-ethnic subjects ages 25-50.

AVERAGE REDUCTION OF BLEMISHES

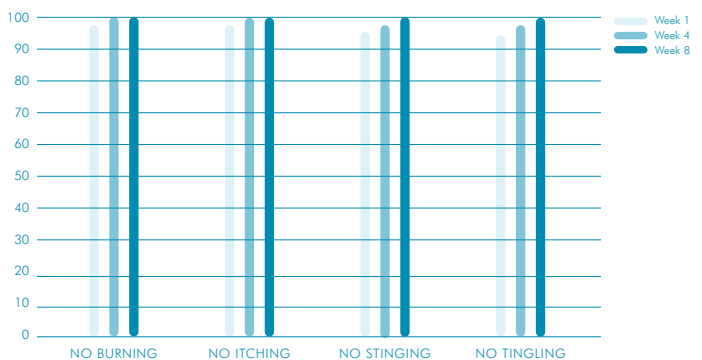

REDUCED SEBUM
BY 39% AT WEEK 4

AVERAGE IMPROVEMENT IN SIGNS OF AGING

IMPROVED FINE LINES
BY 28% AT WEEK 4

BLEMISH + AGE SOLUTION

CLEANSE & TONE

A perfect partner to Blemish + Age Cleansing Gel and Blemish + Age Defense, Blemish + Age Solution is an ideal anti-blemish, anti-aging toner. A targeted combination of acids removes surface cells, decongests pores, and resurfaces skin.

FEATURES AND BENEFITS

Micro-exfoliating toning solution created for skin prone to blemishes and aging

- Removes excess residue and primes skin
- Prepares skin for clinical peel procedures, particularly Micropeel or Micropeel Plus

0.25% Capryloyl Salicylic Acid

- Precise, lipid-soluble exfoliation
- Decongests clogged pores
- Diminishes surface indicators of age

0.25% Salicylic Acid

- Refines pores
- Helps reduce breakouts

3.5% Glycolic Acid

- Accelerates exfoliation
- Hydrates skin
- Reduces the appearance of signs of aging

USAGE AND RECOMMENDATIONS

- Inflammatory blemishes
- Non-inflammatory blemishes
- Photodamaged or photoaged skin
- Hyperpigmentation or uneven skin tone
- Fine lines and wrinkles
- Combination/oily skin
- Prior to clinical peels, particularly Micropeel or Micropeel Plus

APPLICATION

Spray Blemish + Age Solution on a cotton round and smooth over face and neck.

BLEMISH + AGE DEFENSE

A key member of the Blemish + Age Line Up, Blemish + Age Defense is a targeted, oil-free approach to treating adult imperfections and signs of aging. This 1st-to-market acid blend combines 2% dioic acid with an optimal alpha- and beta-hydroxy acid formulation, designed to prevent the formation of blemishes, minimize hyperpigmentation, and reduce the appearance of fine lines and wrinkles.

Specifically created for the concerns of the blemish-prone adult, Blemish + Age Defense goes beyond efficiently treating imperfections to also address signs of aging. Salicylic acid and capryloyl salicylic acid combat blemishes; glycolic and citric acids treat fine lines, wrinkles, and roughness; and the addition of dioic acid fights imperfections, reduces excess sebum production, and prevents hyperpigmentation that can cause skin to appear prematurely aged.

Clinical studies on the Blemish + Age Line Up showed significant improvements in inflammatory and non-inflammatory blemishes, fine lines, and uneven skin tone, while displaying exceptional tolerance and lack of side effects. Blemish + Age Defense is a highly tolerable, efficient treatment for aging, blemish-prone skin.

FEATURES AND BENEFITS

Powerful, targeted serum to address adult blemishes and signs of aging

- In a clinical study, significantly reduced pustules by week 1, and sebum production and fine lines by week 4
- May be used all over the face to prevent and correct imperfections and aging
- Prepares skin for clinical peel procedures, particularly Micropeel or Micropeel Plus
- Cosmetically elegant formula is ideal for layering with other products and under make-up

2% Dioic Acid

- Inhibits sebum production
- Reduces P acnes bacteria
- Prevents hyperpigmentation caused by inflammation or UV exposure

0.3% Capryloyl Salicylic Acid

- Precise, lipid-soluble exfoliation
- Decongests clogged pores
- Diminishes surface indicators of age

1.5% Salicylic Acid

- Refines pores
- Helps reduce breakouts

3.5% Glycolic Acid and 0.5% Citric Acid

- Accelerate exfoliation
- Reduce the appearance of signs of aging

USAGE AND RECOMMENDATIONS

- Inflammatory blemishes
- Non-inflammatory blemishes
- Photodamaged or photoaged skin
- Hyperpigmentation or uneven skin tone
- Fine lines and wrinkles
- Combination/oily skin
- Prior to clinical peels, particularly Micropeel or Micropeel Plus

APPLICATION

Once or twice daily, apply 4-5 drops of Blemish + Age Defense to a dry face.

KEY INGREDIENTS

Results based on *in-vivo* testing

Dioic Acid

- Derived from a natural, vegetable source
- Stimulates peroxisome proliferator-activated receptors for anti-blemish and anti-aging results
- Powerful “before and after” effect: Reduces the presence of P acnes bacteria, inhibits sebogenesis, and prevents hyperpigmentation

Capryloyl Salicylic Acid

- Unique lipid structure that is similar to the lipid structure of human skin
- Targets optimal cells for exfoliation, resulting in a precise, “cell-by-cell” desquamation
- Anti-bacterial and anti-inflammatory

Salicylic Acid

- Lipid-soluble beta hydroxy acid
- Accelerates the desquamation of epidermal cells
- Highly effective at clearing cellular debris

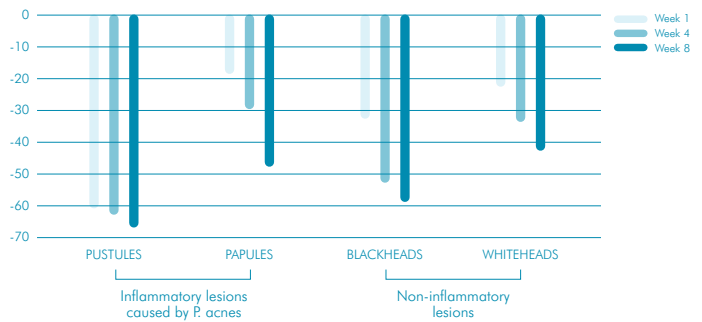

Glycolic & Citric Acids

- Alpha hydroxy acids
- Work synergistically to reduce cell adhesion in the upper levels of the epidermis
- Smooth skin, reduce skin imperfections, and minimize the appearance of fine lines and wrinkles
